Sound Surveillance™

## KMSP-1 Microphone Keyed Mute Switch with LED Status Indicator

### Description

The KMSP-1 is a flush mount, stainless steel, keyed mute switch with an LED status indicator for use with ETS SM1 series microphones. The KMSP-1 is typically used in interview or interrogation rooms when it is required that the microphone be turned off on occasion. The KMSP-1 can be located anywhere along the cable run between the microphone and head end equipment.

Connects directly to our switcher / mixer / amplifiers or use one of our many interface products to make fast and clean connections to DVRs or remote monitoring equipment.

### Includes:

- KMSP-1 flush mount keyed mute switch
- 2 keys
- Mounting screws.
- Warning label.
- Installation instructions.

### Wiring requirements:

2 conductor shielded (with drain wire) 22 gauge stranded. Max cable length 1500'

### Caution

*It is the responsibility of the installation company and end user to install this audio surveillance equipment in compliance with state and federal privacy laws. If you are unfamiliar with these laws, consult a qualified attorney.*
