## EDKS-1GEA-PKSG PoE++ IP Device (Camera) Kill Switch

CAT 5 or 6 Network connection with PoE

Network Switch with PoE

PC

**PoE IP camera** 

The user enters a unique 8 button press pattern to disable the camera. 126 patterns can be programmed into the EDKS-1GEA-PKSG. A new pattern can be memorized within 5 seconds of a valid pattern entry

The red LED of the EDKS-1GEA-PKSG is lit when the IP device (Camera) is Disconnected from the network and green when connected.
